ASML · 2019 · E1-6

**Generated disclosure · verbatim**

ASML’s Scope 1 footprint has historically been defined as emissions from the combustion of natural gas and purchased $CO_2$.

**Extracted DC**

ASML's Scope 1 footprint has historically been defined as emissions from purchased $CO_2$.

**Visible evidence · Evidence 2 · source year 2018**

CFO Chief Financial Officer Code Dutch Corporate Governance Code Code of Conduct Code of ethics and conduct Company ASML Holding N.V. CO2 Carbon Dioxide Consists of the combustion of natural gas and purchased CO2 CO2 footprint - direct scope 1 Calculated by multiplying electricity consumptions of the manufacturing locations by the local conversion factors

**Automatic diagnostic rationale**

The evidence states that ASML calculated its direct Scope 1 $CO_2$ footprint from manufacturing-site electricity consumption using local conversion factors, which is incompatible with defining it as emissions from purchased $CO_2$.
