Generated disclosure · verbatim

Wärtsilä also uses an online solution for supply-chain risk identification, assessment and monitoring, with more than 2,000 suppliers followed against defined key criteria.

Extracted DC

Wärtsilä uses an online solution for supply-chain risk identification.

Visible evidence · Evidence 7 · source year 2019

Wärtsilä uses an online solution for supply chain risk identification, assessment, and monitoring. More than 2,000 suppliers have been, and continue to be, followed through the system. The solution includes a selection of key criteria defined by Wärtsilä, against which the situation of each supplier is continuously measured. Any

Automatic diagnostic rationale

The evidence establishes that Wärtsilä used an online solution for supply-chain risk identification in 2019, but does not establish its use in the 2022 reporting year.
