a Study scope and supplied evidence
30 companies
Selected sample
×
5 reporting years
2019–2023
×
12 ESRS tasks
E1 · S1 · G1
=
1,800 planned
Cases
1,798 analysed
Paired disclosures
2 incomplete BACE cases excluded; no zero imputation
Source material
Reports → narrative and table rows
Report years: t−4 through t−1
Extracted metric records
Source years: t−4 through t
Hybrid retrieval
BM25 + dense embeddings
Company and year filters
Up to 10 cards per type
Supplied evidence (E)
Up to 30 ordered cards
Narrative · Table · Metric
b BACE assessment and the human-review boundary
Supplied evidence (E)
Prompt-visible cards
Generation
Generated disclosure
One company–year–task case
Material qualifiers
Entity · Period
Population · Scope
Metric · Unit
Status · Certainty
Extract, review, deduplicate
Extract, review, deduplicate
Evidence claims (ECs)
Extracted evidence propositions
Disclosure claims (DCs)
Extracted disclosure propositions
Support is conditional on extracted claims and candidate selection
Candidate selection
EC and DC texts
Per DC
Judgment inputs
One DC + candidate ECs
Company + reporting year
Support verdict
Direct / Inferred / Unsupported
If unsupported
Prepared human assessment — annotation pending
Same DC, candidate ECs, company and reporting year
600 sampled claims; 2 workbooks; local labels blank
Diagnosis
Six ordered categories
